

PRODUCTS & IDEAS

BOR IN ORDER

Launched with the claim to be the 'holy grail' for vehicle oil, **NANOBORON UK** is clearly confident that in the shape of **BORPower** it has a product from which you can derive numerous benefits. It is an oil additive which the company says has been scientifically proven to improve fuel consumption.

Other product benefits include: **extended engine life span (up to 100%), reduced maintenance costs and prolonged service intervals. Efficiency-wise, it is said to improve engine power, lessen engine wear, reduce oil temperature and also last up to an impressive 40,000 miles of vehicle use. Finally, the product is environmentally friendly – being non-toxic, non-acidic and chemically inert – which results in less emissions, waste and engine noise.**

MASTER FERODO

Federal-Mogul's leading friction brand, **FERODO**, has recognised the need to eliminate brake noise with its new Thermo Quiet (TQ) Light Vehicle Brake Pad, which provides a revolutionary solution to the problem.

The TQ range covers more than 90% of the European car parc and each pad set is supplied either complete with accessories matching O.E. standards or in some cases, notably prestige German vehicles, TQ is sold with even more fitting hardware, such as wear indicator leads which are usually sold separately for such applications.

The pad eliminates noise and vibration by using advanced dampening material that's discharged through holes in the backing plate, in tandem with an underlayer, allowing reduction of noise-causing vibration and other brake-related energy. This means heat is spread over the total pad surface area, making for an almost silent performance, not to mention an extended pad life.

IF THE SHOE FITS

TRW AUTOMOTIVE AFTERMARKET has announced a further range extension for its market leading chassis programme. Comprising 70 new products, the range extension covers 1,237 applications.

Any business that manufactures or sells is operating under increasingly tough conditions, as the consumer becomes ever more demanding, so the company firmly believes that range extensions such as this can only help.

In detail, the extension includes: 19 brake pads, seven brake shoes, one shoe fitting kit, one master cylinder, 11 hoses and 25 steering and suspension parts.

Applications for the new references cover a wide spectrum of marques and models, and include the popular: Toyota Auris and Yaris and the Vauxhall Astra and Zafira.

SAFE AS HOUSES

A safe is a must-have item for a business. **SEALEY** currently stocks four models in various sizes ranging from small to large. The heavy-duty construction features a powder-coated finish and the compact design, pre-drilled holes and security fixings allow the safe to be hidden away discreetly. Supplied with twin locking bolts, the safes are easily operated via an electronic keypad accepting a combination of between three and eight numbers. Features include three LEDs showing security, power and operating status and features battery back-up and manual override.
